PROFILE SUMMARY

Test Automation Engineer experienced in manual and automated testing of healthcare desktop and web applications for Philips and GE Healthcare. Builds reusable automation with C#, Python, Java, FlaUI, Selenium, and TestComplete. Focuses on BDD, end-to-end validation, parameterized execution, regression testing, and failure investigation, with hands-on testing on CT physical machines.

TECHNICAL SKILLS

Languages	C#, Python, Java, SQL
Automation	FlaUI, Selenium WebDriver, TestComplete
Frameworks & approaches	NUnit, SpecFlow, Cucumber, BDD/Gherkin, Page Object Model, parameterized testing
Testing	Manual, desktop, web, end-to-end, functional, regression, sanity, smoke, integration, UI, boundary, negative, defect verification
Delivery & version control	Git, GitHub, GitLab, Git Bash, GitHub Actions, Azure DevOps pipelines
API & methodologies	Postman; Agile, regression and release validation

PROFESSIONAL EXPERIENCE

AlgoShack Technologies | April 2024 – Present

Philips — IGT Azurion

AlgoShack Technologies | Test Automation Engineer
July 2025 – Present | Bengaluru, India

- Developed and maintained C#, FlaUI, NUnit, and SpecFlow automation components for WPF healthcare applications, including tree navigation and UI synchronization.
- Implemented expected-versus-actual PSC procedure validation, reporting missing and unexpected procedures across system configurations.
- Created reusable helpers for scrolling, screenshots, OCR-based UI checks, and XML/JSON processing; supported multiple Azurion variants through configuration-driven validation.
- Investigated automation failures using logging and exception handling; executed smoke, regression, integration, and release validation tests with Azure DevOps pipeline integration.

PROFESSIONAL EXPERIENCE — CONTINUED

GE Healthcare — Elever

AlgoShack Technologies | Test Automation Engineer
May 2025 – August 2025 | Bengaluru, India

- Designed manual test cases for functional, regression, UI, validation, boundary, and negative testing.
- Translated user stories and business requirement documents into detailed test scenarios and cases.
- Automated healthcare web workflows using Java and Selenium, with reusable step definitions and feature files.
- Participated in daily stand-ups, sprint planning, and retrospectives to support Agile delivery.

Philips — CT-Incisive

AlgoShack Technologies | Test Automation Engineer
April 2024 – March 2025 | Bengaluru, India

- Designed automated web application tests using Python and TestComplete, with execution on CT physical machines.
- Validated complete user workflows through end-to-end, functional, regression, and sanity testing across multiple builds.
- Created common custom methods and parameterized tests, reducing automation maintenance by 40%.
- Implemented BDD with Cucumber and Gherkin; built reusable step definitions and feature files to improve maintainability and scalability.
- Executed manual and automated test cases and batches on CT physical machines; analyzed reports, resolved script issues, and maintained stability.
- Worked with developers and QA teams to investigate defects, and collaborated regularly with clients to develop test cases.
- Mentored junior team members in Java and Cucumber test automation and shared practices for consistent quality.

EDUCATION

Bachelor of Engineering — Computer Science Engineering
Visvesvaraya Technological University | August 2019 – August 2023 | CGPA: 8.0
