PROFILE SUMMARY

Test Automation Engineer with over 2 years of experience in manual and automated testing of healthcare desktop and web applications. Experience with C#, Python, FlaUI, Selenium, TestComplete, NUnit, and SpecFlow. Work includes BDD scenarios, reusable automation components, configuration validation, regression execution, and failure investigation for Philips and GE Healthcare client assignments.

TECHNICAL SKILLS

Languages	C#, Python, Java, SQL
Automation Tools	FlaUI, Selenium WebDriver, TestComplete
Frameworks	NUnit, SpecFlow, BDD/Gherkin, Page Object Model (POM), configuration-driven validation
CI/CD & Version Control	Git, GitHub, GitLab, Git Bash, GitHub Actions, Azure DevOps pipelines
Project & Delivery Tools	Azure DevOps - used on Philips IGT Azurion
API Testing	Postman
Testing Types	Manual, automation, desktop, web, regression, smoke, integration, defect verification
Methodologies	Agile; regression and release validation

PROFESSIONAL EXPERIENCE

Employment: April 2024 - Present

AlgoShack Technologies July 2025 - Present

Test Automation Engineer

Client: Philips (IGT Azurion) | Bengaluru, India

- Developed and maintained C#, FlaUI, NUnit, and SpecFlow automation components for WPF healthcare applications, including tree navigation and UI synchronization.
- Implemented expected-versus-actual PSC procedure validation, reporting missing and unexpected procedures across system configurations.
- Created reusable helpers for scrolling, screenshots, OCR-based UI checks, and XML/JSON processing; supported multiple Azurion variants through configuration-driven validation.
- Investigated automation failures using logging and exception handling; executed smoke, regression, integration, and release validation tests with Azure DevOps pipeline integration.

PROFESSIONAL EXPERIENCE - CONTINUED

AlgoShack Technologies May 2025 - Aug 2025

Test Automation Engineer

Client: GE Healthcare (Elevar) | Bengaluru, India

- Developed and maintained Python and Selenium WebDriver tests for business-critical web workflows using Page Object Model and reusable utilities.
- Executed regression scenarios across Chrome and Microsoft Edge, analyzed failures, and maintained scripts as application workflows changed.
- Supported GitHub Actions integration and participated in sprint planning, code reviews, and Agile team discussions.

AlgoShack Technologies Apr 2024 - Mar 2025

Test Automation Engineer

Client: Philips (CT-Incisive) | Bengaluru, India

- Automated desktop healthcare workflows using Python and TestComplete; developed and maintained Gherkin BDD scenarios and reusable keywords.
- Validated DICOM and imaging workflows, couch movement, UI controls, and progress indicators; maintained common Python utilities for repeatable execution.
- Executed regression batches, smoke tests, and defect verification; analyzed execution reports and investigated script and application failures with developers.
- Improved object identification and synchronization to address unstable tests and support reliable release validation.

EDUCATION

Bachelor of Engineering - Computer Science Engineering
Visvesvaraya Technological University | August 2019 - August 2023 | CGPA: 8.0
